Service Agreement

Date-Fecha

- Ι. PURPOSE. The City of Combes Water Department is responsible for protecting the drinking water supply from contamination or pollution, which could result from improper private water distribution system construction or configuration. The purpose of this service agreement is to notify each customer of the restrictions, which are in place to provide this protection. The utility enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before the City of Combes Waterworks will begin service. In additions, when service to an existing connection has been suspended or terminated, the water system will not re-establish service unless it has a signed copy of this agreement.
- RESTRICTIONS. The following unacceptable practices are prohibited by State regulations. II.

Applicant's Signature – Firma de Aplicante

- A. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential source of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
- B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be elimated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.
- C. No connection which allows water to be returned to the public drinking water supply is pemitted.
- D. No pipe or pipe fitting which contains more than 0.25% lead may be used for the installation or repair plumbing at any connection which provides water for human use.
- E. No solder or flux which contains more than 0.2 percent lead can be used for installation or repair of plumbing at any connection which provides water for human use.
- III. SERVICE AGREEMENT. The following are the terms of the service agreement between the City of Combes Waterworks (the water system) and customer.
- A. The water system will maintain a copy of this agreement as long as the customer and/or the premises is connected to the water system.
- B. The customer shall allow his property to be inspected for possible cross-connection and other potential contamination hazards. These inspections shall be conducted by the water system or its designated agent prior to initiating new water service; when there is reason to believe that cross-connection or other potential contamination hazards exist; or after any major changes to the private water distribution facilities. The inspection shall be conducted during the water system's normal business hours.
- C. The water system shall notify the customer in the writing of any cross-connection potential contamination hazard which has been identified during the initial inspection or the periodic reinspection.
- D. The customer shall immediately remove or adequately isolate any potential cross-connections or other potential contamination hazards on his premises.
- E. The customer shall, at his expense, properly install, test and maintain any backflow prevention device required by the water system. Copies of all testing and maintenance records shall be provided to the water system.
- F. The water department shall enforces the Water and Sewer Ordinance, you may request the most recent Ordinance.
- IV. ENFORCEMENT. If the customer fails to comply with the terms of the service agreement, the water department shall, at its discretion, either terminate service or properly install, test and maintain an appropriate backflow prevention device at the service connection. Any expense associated with the enforcement of this agreement shall be billed to the customer.
